

The path to parenthood through IVF is an emotional journey filled with excitement, hope, and uncertainty. A solid legal framework offers protection, helping to prevent unforeseen complications and strengthens the chances of a seamless experience. Alongside medical guidance, seeking legal support can provide the security and confidence needed to build your family on a strong foundation.

Andrew Rader, Esq.

Andrew Rader, Esq., Founder and leader of Rader Law Group, is within the top 1% of lawyers who have been awarded board certification by the Florida Supreme Court in civil trial practice.

For over 30 years, Andrew has served clients across Florida and New York in both state and federal courts.

Rader Law Group, LLC, continues to be a leading South Florida personal-injury and commercial-litigation law firm, focusing on serious car accidents, slip/trip and falls, catastrophic injuries, business disputes, and medical malpractice.

Andrew is recognized and called upon for his expert handling of IVF cases, including contract review and reproductive negligence (embryo destruction, IVF mix-ups), and unregulated behavior in the in vitro fertilization sector.

A Legal Guide for Your IVF Journey

Insurance & Financial Protections

- What happens if a cycle is canceled or fails—do I get a refund or credit for future treatments?
- Does the clinic offer guidance on insurance coverage for fertility treatments?
- What are the fees for embryo storage, transfer, or retrieval?

Liability & Legal Protections

- Who is legally responsible if an error occurs during fertilization, embryo storage, or implantation?
- What happens if the clinic mislabels or misplaces embryos?
- Does the clinic have malpractice insurance that covers embryo-related incidents?

NOTES

Legal Considerations

Consent & Ownership of Embryos

- Who owns the embryos?
- What happens to the embryos in the event of divorce, separation, or death?
- Can I specify how embryos should be used or disposed of in the future?

Storage & Handling of Embryos

- What are the clinic's policies and procedures for storing embryos?
- How long can embryos be stored, and what happens if I stop paying storage fees?
- What safeguards are in place to prevent mix-ups or loss of embryos?

Surrogacy & Third-Party Reproduction

- What legal agreements are required for using a surrogate, sperm donor, or egg donor?
- Does the clinic help facilitate contracts with donors and surrogates, or do I need an attorney?
- How does the clinic ensure donor and surrogate rights are legally protected?

Genetic Testing & Reporting

- What genetic tests are performed on embryos before implantation?
- What happens if an embryo is found to have a genetic disorder?
- Can I request that my embryos be used only for specific medical conditions or preferences?
